Class IV—

Nature study based on school gardening. (Recommended for rural schools, optional.)

Each scholar to keep a diary in which to note down the date of sowing, the time taken for germination, the percentage of germination, the rate of growth after germination. In each stage of growth the scholars will pull up a specimen and observe the roots, their uses and growth, the stems and leaves and their uses and structure: the flowers—their parts and uses, the methods of fertilization, the fruits and seeds. All

these to be noted in the diary. To observe the kinds of soil—clayey, sandy, loamy; the power of each to absorb and retain moisture. Plant food in the soil. The effect of manures, showing the effect of different manures as cowdung, oilcake, ashes and nitrate of soda on the growth of plants, of phosphates of fruits, etc. The plots should be drawn, to scale and all results recorded in the note book.
